REALISTISCHE FUNKTIONEN

REALISTIC FUNCTIONS

MOTOREN MOTORS

Damit kommt Leben ins Modell!

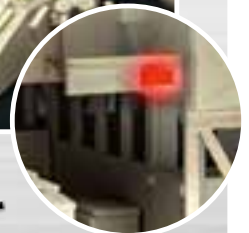

Mit Revell Technik kommt Leben in den Plastikmodellbau. Hochdetaillierte und anspruchsvolle Modellbausätze werden mit modernen Elektronikkomponenten aufgewertet, die es ermöglichen Beleuchtung und Bewegung am Modell umzusetzen.

Alle Komponenten sind individuell auf den jeweiligen Bausatz abgestimmt und können direkt verbaut werden. Aufwendiges Löten und Zurechtschneiden der Kabel entfällt. Die vorprogrammierte Steuereinheit schaltet vollautomatisch die Funktionen am Modell und sorgt damit für eine realistische Darstellung.

Bring life to your models!

Revell TECHNIK brings life to plastic model kit building. Highly detailed and sophisticated model construction kits are upgraded to include modern electronic components which will allow the incorporation of light and movement into the model.

All components are individually matched to the respective kit and can be installed without fuss. Complex soldering and wire trimming is not necessary. The pre-programmed control unit automatically activates the functions on the model and thus ensures a realistic effect.

SPRAY COLOR 100 ml

Erst durch die optimale Bemalung erhält ein Modell sein originalgetreues Aussehen. Insbesondere große Flächen lassen sich jedoch nur schwer mit dem Pinsel lackieren. Für diese Anwendungen gibt es jetzt die 32 am häufigsten verwendeten Revell-Farben in der praktischen 100-ml-Sprühdose.

Revell Spray Color sind Acrylfarben, die sehr schnell trocknen und eine hohe Deckkraft sowie eine hohe Kratzfestigkeit besitzen. Aufgrund ihrer besonderen Zusammensetzung lassen sich mit Spray Color auch Polycarbonat-Karosserien von RC-Cars lackieren.

A model only gets its true-to-the-original appearance after receiving an optimal paint job. Large surfaces, in particular, can only be painted with a brush with great difficulty. For these applications, the 32 most frequently used Revell colours are now available in 100ml spray cans.

Revell Spray Color is a series of acrylic paints which dry very quickly, have a high opacity and have high scratch-resistance. Due to the special composition, Spray Color paints can also be used on polycarbonate bodies of RC cars.
